

5/27/99

RADAC meeting

10:00-11:30

I. Requirements

- The team began looking at a reformatted version of the requirements document
- This is in preparation for writing a Statement of Work to get a consultant to:
 - (1) tell us if our requirements are realistic
 - (2) tell us if any vendor can supply all or part of what we require.
- Any questions, concerns, omissions, or general thoughts about the requirements should be addressed at the next meeting.

II. p4 configuration management software has been downloaded

- The following 3 modules are located on the anonymous file server in the directory pub/p4 :

perforce.exe	Windows client and server installer
p4	IRIX 6.2 client
p4d	IRIX 6.2 server
- The documentation is online at <http://www.perforce.com/>.
- The server is currently setup on an Iris whose IP address is 128.154.20.61 and the p4 port is 1666. You will need these parameters when you install one of the clients.
- If you get a chance, try it out. (If you understand how to use it, please let Tom know.)

III. Comments

- **Next meeting** - Friday 6/4/99 at 10:00
